Choice at Your Guest's Fingertips

SAUDIGITAL

HOSPITALITY IPTV SOLUTIONS

Discerning hotel guests expect unparalleled content experiences – and real-time streaming options - at the flick of a switch and via immersive moments.

The insatiable appetite to consume content demands ever-engaging experiences that deliver unlimited choice, ease-of-use, and flexibility.

Enter the IPTV solution: Immersive tech that's engaging and informing guests – through the NTV in-room, lobby displays, function rooms or elevators. Setting a new benchmark, guests are now in control – spoilt for choice with unlimited access to what's relevant for them during their hotel stay.

Quality Content   **Realtime Information**   **Intuitive Data**   **Interactive Compendium**

IPTV
FEATURE SUMMARY

Quality Content

HD content delivered over ethernet; over 120 titles available for selection from across 16 production studios, updated monthly, and discovered through an advanced and intuitive user interface. Additionally, guests can stream content from their own devices with added Chromecast support.

Realtime Information

Guests can enjoy access to numerous news feeds including time and weather information, online radio channels and an Electronic Programming Guide (EPG).

Intuitive Data

Hotel staff can stay informed on equipment status, billing reports (based on purchased content), and the added ability to block rooms from access to content (if required).

Digital Compendium

Interactive compendium for guests, allowing access to information on hotel services. Guests can also utilise compendiums to display seasonal and location-relevant information and news.

PMS Integration

Make guest experiences memorable with an array of Hotel PMS (Property Management System) features that provide hotels with a big picture advantage — like creating the right first impression for guests — to the finer customer service touches like providing guests with access to review hotel accounts.

KEY FEATURES

- **Welcome Message**
  Have your guest greeted with a personalised 'name' message, making it a much more individualised and memorable hotel room experience.

- **Guest & Picture Messaging**
  With the flick of a switch, guests can access important messages on-screen and stay up-to-date with hotel accounts and all relevant information.

- **Bill Review**
  Grant guests the ability to review hotel accounts and transaction history, allowing for up-to-the-minute information and a more informed and enjoyable stay.

- **Express Check Out**
  Once guests have concluded their stay, they have the added convenience and flexibility to enjoy express check out – particularly appreciated for early and quick exits.
